

Dynamic Planner Risk Profiler

10 Questions

1 Introduction

In order for your adviser to provide you with financial advice, they need to understand your experience of investing in financial products and approach to risk. To do this they have adopted Dynamic Planner's risk profiling process comprising 3 short sets of questions, which normally takes less than 10 minutes to complete.

- Firstly, you will be asked about your experience of investing in different financial products.
- Next, your attitude to investment risk will be explored by looking at how much risk you would be prepared to take in different situations.
- Finally, you will be asked a few questions to help your adviser understand your capacity for taking investment risk given your current financial position.

Once you have answered all these questions, return this document to your adviser who will work out your risk profile and use this to inform the financial advice they provide.
